Data Types\Number\ Expression

the result of this evaluation can be used to activate other responses.

Example

In the example below when the "**Import_UPS**" geometry is clicked "**Evaluate Number Expression**" is executed. The expression is simple math.sqrt(16), and the result is linked to the "**Set Number Variable**" node, in "**result**" variable. This variable is then linked to a "Variable Writer" to display it.
