SimLab CADVRter

It's a standalone tool included with SimLab Composer Mechanical and Ultimate Editions. It is an application created to convert any supported file format individually (single file at a time) or collectively (multiple files at a time) to any supported file format in one shot, besides its ability to convert most CAD files to VR-ready walk-throughs possible to be exhibited on regular monitors and VR headsets.

SimLab CADVRter comes by default with SimLab Composer, where the user can have it installed after the installation process of SimLab Composer is completed. The user can access the application from the desktop shortcut created by the installer of SimLab Composer, or alternatively from the installation directory of SimLab Composer, where it can be usually found in the following directory path:

C:\Program Files\SimLab\SimLab Composer 10\SimLabCADConverter.exe
