Help Menu

In this menu, the user has access to different sources of information about SimLab VR Studio.

News

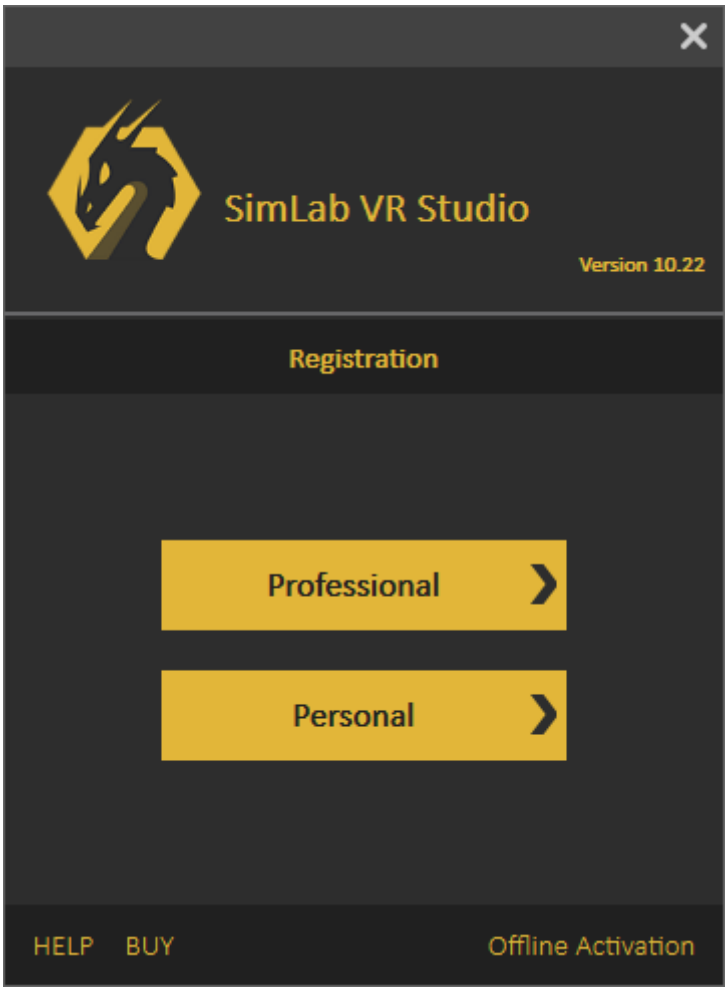

Starting with News, where a dialog will be displayed including latest news regarding the application, and its updates.

Check for Updates

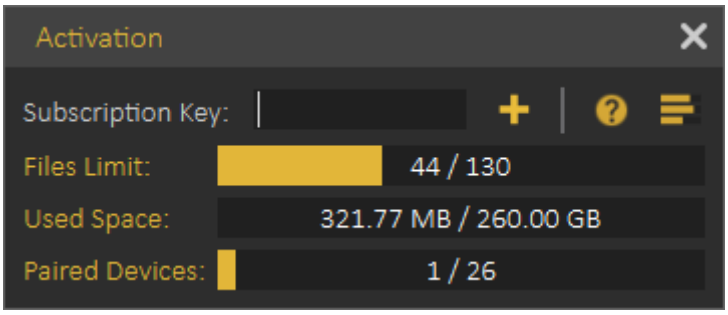

Check for Updates, as the name implies, will display the dialog with the latest release of the application.

License

License, displays the Registration dialog, where the user can request to start a free personal license, request a trial license, or activate a professional license. More information about VR Studio licensing process can be found here

Cloud License

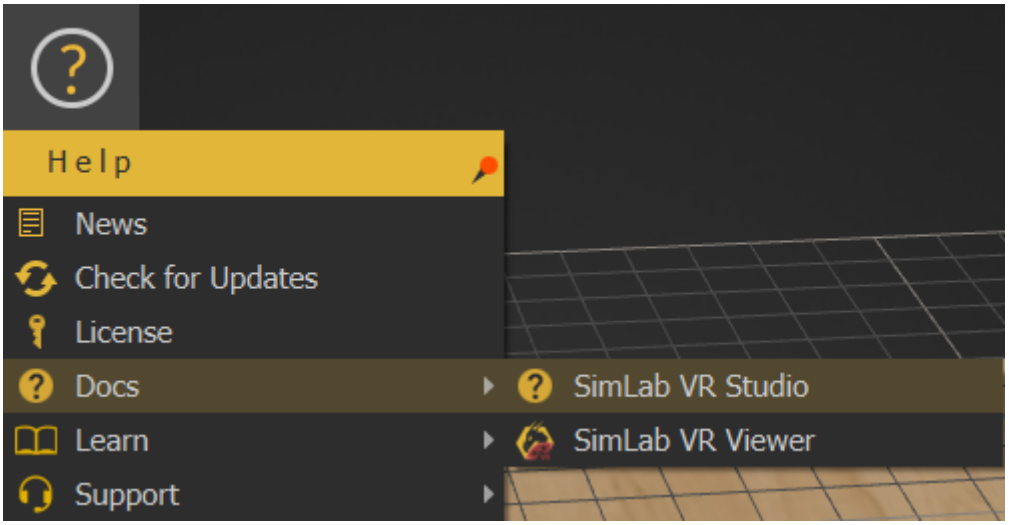

Cloud license option allows the user to do the following:

- View current cloud account status
  - Number of models uploaded
  - Used cloud space
  - Number of paired devices
- Add additional cloud keys to increase cloud account capacity or to extend its period.

Note: Professional software key received when ordering a license of VR Studio is also a valid Cloud Key, so the user can use it to activate the Cloud account. All what the user needs to do is register a Cloud account then to add the key.
