Managing VR Experiences through Catalogs

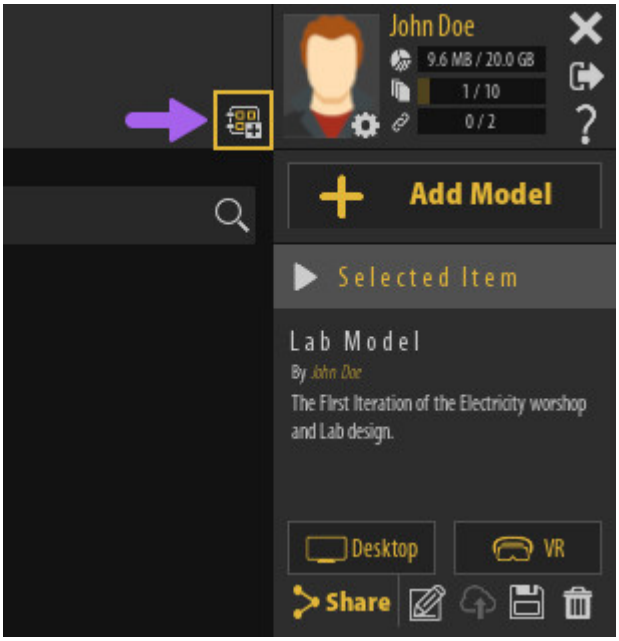

Accessing and Managing VR Experiences

Once you have added the VR Experience to SimLab VR Viewer, you will find it in the "My Models" Tab which is the default location where uploaded VR Experiences will be displayed.

Creating a Catalog

For better management of VR Experiences, you can add Catalogs, which in principle are similar to folders where you can contain multiple VR Experiences inside it.

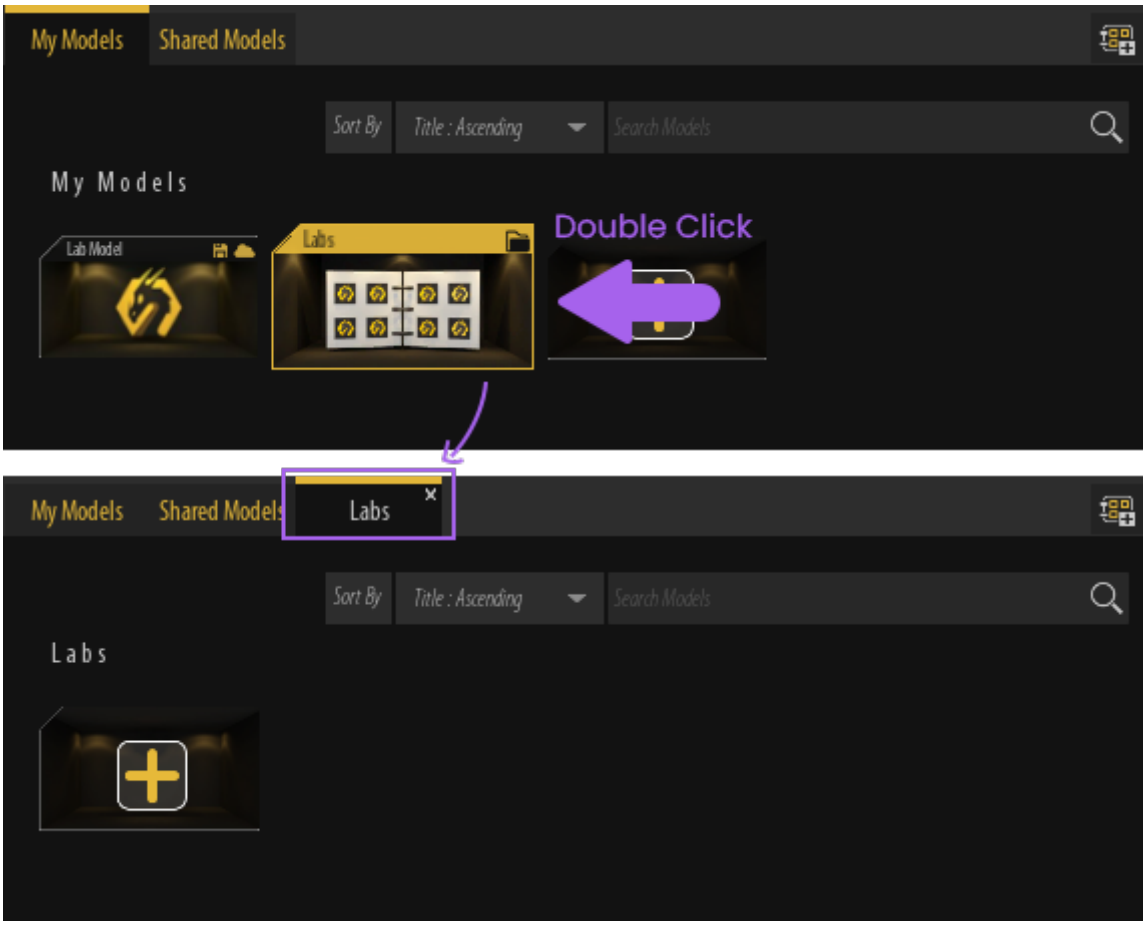

To create a new Catalog, Click on the **Catalog Icon** at the top right corner of SimLab VR Viewer.

In the Add Catalog Dialog, you can specify the **name** of the Catalog, the **Publisher's name**, a **Description**, and implement **Tags** to find it easily using the search box.

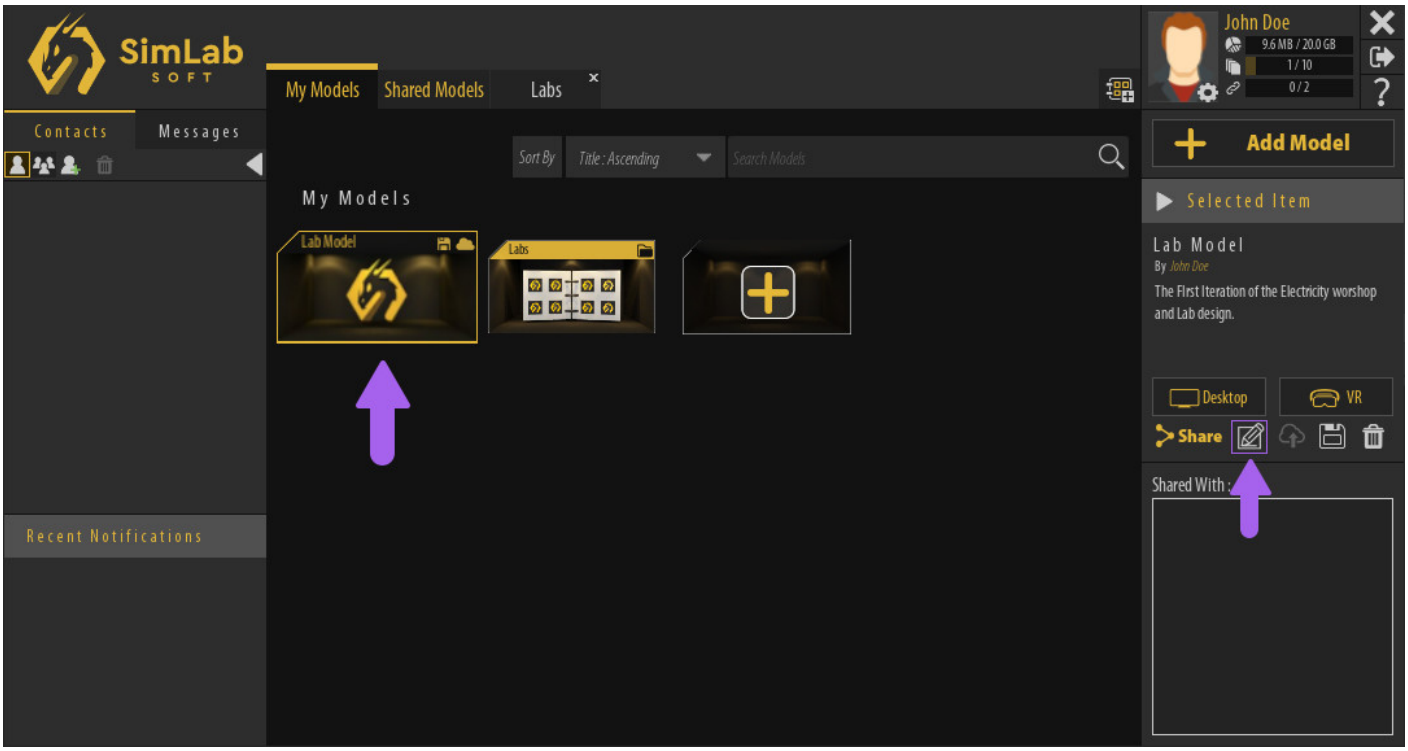

Click "Ok" to create the Catalog and add it to **"My Models"** Tab.

Once the Catalog Has been Created in "My Models" tab, you can Double Click it to View its content in a New Tab.

Moving VR Experiences to Catalogs

To Move a VR Experience to a Catalog, select the VR Experience and from the Selected Item Panel to the right, Click on the **Edit Icon**.

Add To Catalog
Show Catalogs
Make This Model Public
Ok

From the Edit Model Dialog, Click on **"Add to Catalog"**.

Select the Catalog where you want to Move the VR Experience and Click OK to Move it there.

Note : When toggling on the "**Home Page**" option, the VR Experience will still have a thumbnail in the homepage in addition to a thumbnail in the selected Catalog.
