Installing SimLab VR Viewer

This chapter guides you through installing the **SimLab AR/VR Viewer** on iOS devices (smartphones and tablets). SimLab VR Viewer is a free, essential cross-platform application required to run, view, and participate in VR experiences, including collaboration sessions and viewing shared SimLab VR packages (.vrpackage files).

Download and Installation

The SimLab AR/VR Viewer is installed directly from the respective app stores. Click the appropriate link below to navigate to the download page:

Platform	Download Source	Link
iOS (iPhone/iPad)	Apple App Store	Download for iOS

1. Open the appropriate store (Google Play or App Store) on your device.
2. Search for "**SimLab AR/VR Viewer**".
3. Tap the **Install** or **Get** button to download and install.

System Requirements

Specification	iOS Minimum
OS Version	iOS 15.0 / iPadOS 15.0 or later
Processor	A12 Bionic chip or greater processor
RAM	4 GB or more
Storage	Sufficient free space (App size is approximately 1 GB).
